

EXTENDABLE DOUBLE DROP TRAILER (LOWBOY)

Extendable Double Drop trailers are utilized to transport oversized freight, both legally and through the use of permits and/or escorts. The primary difference between an Extendable Double Drop trailer and a standard Double Drop trailer is the ability of the Extendable trailer to extend/stretch out the well via two bars which allows for the transportation of longer commodities of up to 60' in length. Full tarping options are available as needed.
